DETAILED ACTION

Election/Restriction

1. This application contains claims directed to the following patentably distinct species of the claimed invention:

1) the specifics of the device being comprised of a second plurality of conductive layers interposed between the first substrate and the sealing member [claims 1, 33-36, 54-58][Figs.2-6];

2) the specifics of the device being comprised of a second plurality of conductive layers interposed between the interlayer insulating film and the portion of the sealing member [claims 51-53, 73-76][Figs.7-8];

3) the specifics of the device being comprised of the conductive layer continuously extends along the side edge for a length longer than a pitch of the scanning lines [claims 37-46, 59-68][Figs.9-11];

4) the specifics of the device being comprised of the plurality of conductive layers are disposed between the plurality of scanning lines and below the portion of the sealing member in a location such that the plurality of conductive layers do not overlap the plurality of scanning lines [claims 47-50, 69-72][Figs.12-15].

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claim appears to be generic.

Applicant is advised that a reply to this requirement must include an identification of the

Art Unit: 2871

species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

2. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Mike Qi whose telephone number is (703) 308-6213.
